PREFACE

The brands contained in this book have been compiled from the original records kept in the office of the Recorder of Brands, 10405-100th Avenue, Edmonton. All new issues, reissues, renewals and transfers of brands and tattoo marks which were in effect as at April 1, 1970, are included in this book. All brands that were issued from April 1 to June 29, during the period of compilation, were included if their conformity to alphabetical order permitted.

Where so many thousands of brands are involved, it is possible that errors have occurred. Should any errors be found, please report to the Recorder of Brands.

Cattle Brands are arranged separately from Horse Brands. The general arrangement followed is alphabetical and numerical. In every case the first letter or numeral of a brand determines the place of the brand in the book. Triangles (Δ) and anchors (\downarrow) which are preceded by a letter or numeral are indexed under that letter or numeral. Where they precede a letter or numeral, they are found between the numerals and the arbitrary signs. The brands are shown in the following sequence according to alphabet: single character, hanging letters, two characters, one letter over another, two characters in line, monograms, three characters in line, three characters consisting of two characters with a bar, half diamond or quarter circle above or below. Brands of one or more arbitrary designs, that cannot be otherwise classified, will be found at the back of the cattle or horse sections respectively, but any brand, containing a letter or numeral with one or more arbitrary designs either before or after it, will be found under that letter or numeral.

The brand A I will be found under the letter I, while the brand 1 6 would be listed in the numerals.

The regulations covering registration of Brands state that quarter circles are shown with the points away from the other two characters, for examples: \overline{ZO} or \overline{ZO} ; half diamonds with the points towards the other two characters, for example: \overline{ZO} or \overline{ZO} .
